Dear Del,

You asked me to document the changes requested by the new SCSI-3 project proposals. Essentially, two projects related to parallel, copper SCSI buses are unchanged and two other projects related to packetized protocols and command sets are replaced by nine projects. Thus we go from four projects to 11 projects:

Old Project

SCSI-3 Parallel Interface (SPI) [855-D]

SCSI-3 Interlocked Protocol (SIP) [856-D]

SCSI-3 Packetized Protocol (SPP) [881-D]

SCSI-3 Command Set (SCS) [854-D]

New Project

(no change)

(no change)

Generic Packetized Protocol (GPP)
Serial Bus Protocol (SBP)
Fibre Channel Protocol (FCP)

SCSI-3 Architecture Model (SAM)
SCSI-3 Primary Commands (SPC)
SCSI-3 Block Commands (SBC)
SCSI-3 Stream Commands (SSC)
SCSI-3 Graphics Commands (SGC)
SCSI-3 Medium Changer Commands (SMC)

These changes are illustrated in the diagram on the next page. If you have any questions, please call.
